SUMMARY

Self-taught developer who designs, builds, and ships **iOS apps solo** — from idea to App Store. Three live apps with in-app purchases via RevenueCat: **GutLog** (health tracker), **Habits Warrior** (RPG habit app), and **SubMind** (subscription manager). Full-stack across React Native, Next.js, and Supabase. Philosophy background sharpens how I think about products: clarity of purpose, nothing unnecessary. **C2 English**, open to remote or relocation.

IOS APPS - LIVE ON APP STORE

GutLog: IBS & Stool Tracker

2025 · gutlog.app

React Native · Expo · TypeScript · RevenueCat · AsyncStorage

- Offline-first health tracker for IBS/IBD patients — **no account, no cloud**, 100% on-device privacy
- Features: Bristol scale logging, context tags, doctor-ready PDF reports, CSV export/import, multi-language
- Monetized with **4 RevenueCat tiers** (weekly \$1.99 · monthly \$4.99 · annual \$12.99 · lifetime \$24.99)
- Shipped 10+ updates since launch; actively maintained with version history on App Store

Habits Warrior: Habit Tracker

2026 · habitswarrior.com

React Native · Expo · TypeScript · RevenueCat · Expo Notifications

- RPG-style habit tracker — earn XP, level up real-life stats (Strength, Wisdom), unlock themes
- Rebuilt from a Next.js PWA to a native iOS app in one month; live on App Store
- GitHub-style heatmaps, radar charts, per-habit reminders, 10+ customizable themes

SubMind: Subscription Manager

2025

React Native · Expo · TypeScript · RevenueCat · Expo Notifications

- Tracks all subscriptions, surfaces renewal dates, and shows monthly/annual spend totals
- Renewal alerts before charges hit; fully offline, no account required
